Make sure that you “Like Us” on Face Book

Our friends and clients do not have to book with us. But they want to!

Your expectations of a travel agency are high, but ours are even higher

Why (not) use a travel advisor (agent). Travelers feel that doing their own planning is empowering and that giving it up will somehow diminish their experience. Their use of the internet causes them to believe they have all the answers they need. They think an advisor (agent) adds to the cost of their trip, but it doesn't, and do not understand the value that an advisor (agent) adds-- example On Board Credit-- or that an advisor (agent) is readily available. Cruise lines even recommend that you use a travel agent for the best deal.

The actual Ports of Call visited are dependent on the selected itinerary and may NOT include all ports
